"Simple is better than complex. Complex is better than complicated."

Summary

As a software engineer with 2 years of experience, I played a pivotal role in the success of my current company. Being a founding engineer, I spearheaded the development of the core features of the product and contributed to making them highly marketable. Recognized as a dedicated team player, I thrive in startup environments leveraging best practices to drive innovation and achieve outstanding results.

Work Experience

Mindkosh AI (beta.mindkosh.com)

Software Engineer

New Delhi (Remote)

Jun 2021 - Present

- **Data Ingestion:** Offloaded file handling from the application server by implementing a secure multi-region S3 data ingestion system using SQS, Redis Queue and Lambda.
- **Dataset Management System:** Helped the users create and manage various kinds of annotation datasets by implementing the dataset management feature.
- **Multi-tenant System:** Enabled members to part of multiple organizations and seamlessly switch between them by leveraging two-stage token-based authentication and role-based authorization system.
- **Video Processing:** Enabled users to create video annotation tasks with ease by implementing and deploying video processing system on ECS cluster.
- **Dev Environment:** Enhanced the productivity of my team by developing a docker-based development environment integrated with git hooks, resulting in nearly 60% reduction in setup time and ensuring development/production parity.
- **Security:** Made the platform safe and secure for the users by implementing hashed authentication tokens, CSRF protection for REST APIs and defence against login CSRF attacks.
- **Server Sent Events:** Helped frontend team avoid expensive polling on the UI for the file upload status by leveraging Redis Pub-Sub and server sent events.
- **Miscellaneous:** Facilitated seamless engagement for users by implementing Google OAuth and Captcha, invitation, notification, and subscription systems.

Skills

• **Back-end:** Django, REST API, PostgreSQL, Redis Queue, FFmpeg • **DevOps:** AWS, Docker, GitHub Actions • **Programming:** Python, SQL, Shell Scripting • **AWS:** EC2, S3, Lambda, SQS, ECS (Fargate), IAM, ECR • **Miscellaneous:** Git, UML, Object Oriented Programming, Web Security, Agile (Scrum)

Education

Shri Vaishnav Institute of Technology and Science

Bachelor of Engineering in Electrical and Electronics

Indore, Madhya Pradesh

Jul 2013 - Aug 2017
